mc_longstaffschwartz2d

Input parameters:

- \bullet Number of iterations N
- Generator_Type
- \bullet Increment inc
- Regressor Basis basis
- Dimension Approximation dimapprox
- Number of Exercise Date exercise_date_number

Output parameters:

- \bullet Price P
- Delta1 δ_1
- Delta2 δ_2

Description:

Computation of Bermudan Option Price with the Longstaff-Schwartz algorithm that gives an estimation of an optimal stopping time using regression method. [1]. Longstaff-Schwartz Method
